### **Notes:**

**Potency:** Potency is determined via USP <621> HPLC, USP<851> Spectrophotometry, and/or specific monograph testing procedures.

**USP<71> Sterility:** This test fully COMPLIES with the USP <71> compendial requirements of sterility testing for the presence of bacteria, yeast, mold, and fungi. Per USP <71>, "This test is applied to substances, preparations, or articles, which, according to the Pharmacopeia, are required to be sterile. A satisfactory result only indicates that no contaminating microorganism has been found in the sample examined under the conditions of the test." Method suitability has been verified. The citation to USP <71> is conditioned on the accuracy of our client's verification that the sampling program complies with the provisions of USP<71>.
